Digital Talent Scholarship Kominfo x Hacktiv8 - Indonesia

Feb 2024 - Mar 2024

Scalable Web Service with Golang, 98.00/100.00

- Learned Go programming fundamentals, OOP, interfaces, Go-routines, error handling, web services, SQL, APIs, JSON & XML parsing, HTTP requests, middleware, as well as testing and debugging.
- Completed a final project implementing all acquired knowledge

Kampus Merdeka x Dicoding Academy - Bandung, Indonesia

Aug 2022 - Dec 2022

Pengembang Front End Web dan Back End, 96.58/100.00

- Selected as one of 1,100 students from nearly 6,764 applicants.
- Developed AJARI, a learning platform for children with sensory disabilities, equipped with accessibility features.
- Built a restaurant catalog using automation testing, end-to-end testing, service workers, and progressive web applications (PWA).
- Created a Movie API using ES6, Custom Elements, NPM, Webpack, and AJAX.
- Developed a Bookshelf API using Node.js.

Projects

Sygnos Knowledge Studio

Oct 2025

Frontend Engineer

A decision-making intelligence platform application that helps companies make data-driven strategic decisions. This platform integrates various internal company data sources through a visual canvas connector system, processing them into actionable insights to support business intelligence and strategic planning.

- Developing an interactive canvas system for data connector management
- Creating a comprehensive dashboard with multiple visualization types
- Ensuring secure enterprise-grade authentication and authorization
- Creating a scalable and maintainable codebase with FSD architecture for developed applications
- Implementing an automated deployment pipeline with Docker and Jenkins

GoBlox

Jul 2025

Frontend Engineer

A modern web application for creating and managing UML diagrams visually. GoBlox enables developers and database architects to design database schemas, class diagrams, and ER models through an intuitive interface. It supports DDL generation for multiple databases, hierarchical project management, and role-based team collaboration.

- Developing an interactive canvas for UML diagram creation
- Providing a DDL generation system for MySQL, PostgreSQL, Oracle
- Creating a hierarchical project structure with drag-and-drop
- Providing a user collaboration system with role-based access control

AJARI

Nov 2022

Frontend Engineer

A web-based learning platform designed to support children with disabilities, particularly those with sensory impairments. The platform provides an adaptive curriculum tailored to each student's individual needs and includes accessibility features to help students better understand and master learning materials.

- Developed accessible and child-friendly user interfaces for users with special needs.
- Built responsive front-end components for optimal viewing across devices.
- Implemented web accessibility standards (WCAG) in interface design.
- Optimized website performance and user experience (UX).

Skills & Achievements

- Hard Skills:** Typescript, Javascript, React Js, Next Js, Vue, Nuxt, Axios, MySQL, HTML5, CSS3, SASS, GSAP, Tailwind, Bootstrap, Ant Design, Vercel, Netlify, Figma, Git Workflow, CI/CD and Design System.
- Soft Skills:** Communication, Problem-Solving, Time Management, Team Collaboration
- Achievement (2022):** Distinction Graduate, Independent Study Batch 3 at Dicoding Academy.
- Achievement (2022):** Best Capstone Project, Independent Study Batch 3 at Dicoding Academy.
- Achievement (2024):** Top-Ranked Mentor, Independent Study Batch 6 at Dicoding Academy
- Achievement (2024):** Study Group Mentor, Independent Study Batch 6 at Dicoding Academy.
